Robert O. Alabi

Software Developer | React | Redux | Ruby | Rails | JavaScript ||
Finance || Audit with ambition to continue learning and to make
impact in any industry. Am currently open for new opportunities
Ghana

Summary

Hello! I am Robert, a full-stack development student currently
enrolled in Microverse, a global remote software development school
where I learned Ruby on Rails and React.

I've spent the 7 months working asynchronously and remotely with
fellow developers across different time zones, I have created an
Expense Tracker platform, which tracks users' expenses and helps
to manage budgets on Ruby on Rails which have received excellent
feedback among Peers and other senior developers.

In my free time, I like reading investment books, viewing software
related articles, and writing reviews about the recent books I read or
movies/series I watched.

Are you looking for a Full-Stack developer? I'm open to new
opportunities. Let's schedule a Zoom chat! Send me an email at
wolo22001@gmail.com.

In my 2 years of experience, I've developed extensive knowledge in

- Front-end development: React JS | JavaScript
- Back-end development: NodeJS | Ruby | Ruby on Rails
- Mobile development: React Native

Am passionate about building workable solutions using tech
structure through collaborations. Open for exploring exciting
opportunities in startups as well as companies with scale.

Check out some of my work at <https://github.com/Alabi12> ; https://alabi12.github.io/Mobile_First/

Experience

Microverse

Full Stack Developer - Self Employed

September 2022 - Present (9 months)

As a full stack developer and a student of Microverse for the past seven months, I have had the opportunity to collaborate with experienced coding partners to build projects using React, Ruby on Rails, Databases, Data Structures, and Algorithms. Participating in this program has greatly enhanced my knowledge of pair programming, communication, planning with necessary tools, time management, and more.

Microverse has provided me with a platform to develop both technical and soft skills. I have learned how to work effectively in a team, communicate my ideas, and manage my time efficiently. These experiences have not only prepared me for a career in tech but also equipped me with the necessary tools to excel in any industry.

With the knowledge and experience gained from Microverse, I am optimistic about translating these skills to the industry of my interest. I am confident in my ability to tackle complex problems, work collaboratively, and produce high-quality work.

Veritas Groups

Accounts and Audit Manager

January 2020 - December 2022 (3 years)

Accra, Greater Accra Region, Ghana

When I first joined the accounting firm, I was excited to take on new challenges and make an impact in the industry. As a junior auditor, I was responsible for a range of tasks that required attention to detail and a strong work ethic.

My primary role was to audit clients' financial reports, which meant poring over countless documents and spreadsheets to ensure accuracy and compliance. It was a tedious job, but I was determined to do it well.

In addition to auditing, I also had the opportunity to prepare financial reports for our clients, adhering to the International Financial Reporting Standards (IFRS). This was a complex task that required a deep understanding of the intricacies of IFRS, but I was able to rise to the challenge and produce high-quality reports.

One of the most rewarding parts of my job was monitoring and advising clients on their statutory payments. It was satisfying to know that my work was helping clients stay on top of their financial obligations and avoid any penalties or fees.

Beyond these core responsibilities, I also had the chance to provide other advisory services to clients. This included everything from tax advice to budgeting and forecasting.

Overall, my time at the accounting firm was a valuable learning experience that allowed me to hone my skills and make meaningful contributions to the industry. I am grateful for the opportunities I had and the supportive team that helped me along the way.

Raegan Consults

Principal Finance Manager

December 2021 - October 2022 (11 months)

Accra, Greater Accra Region, Ghana

During my tenure as a financial services provider, I was tasked with several critical responsibilities that had a significant impact on the financial well-being of our clients. One of my key responsibilities was creating financial models to help clients make informed business decisions. This involved analyzing market trends, studying financial statements, and forecasting potential outcomes.

Another important aspect of my role was the management of financial resources. I worked closely with clients to develop budgets and allocate funds effectively. I also helped set up financial systems to ensure efficient and accurate management of financial data.

In addition to financial modeling and resource management, I oversaw the implementation of an inventory management system that helped clients optimize their supply chain operations. This involved tracking inventory levels, forecasting demand, and streamlining logistics processes.

Another critical area of responsibility was the tracking of point-of-sale (POS) systems. I worked closely with clients to analyze sales data and identify trends that could inform strategic business decisions. This involved developing reports that provided valuable insights into customer behavior and market dynamics.

As a financial services provider, I was also responsible for tax and other statutory management. This meant staying up to date with the latest regulations and ensuring that clients were in compliance with all relevant laws.

Finally, I oversaw financial reporting, which involved preparing financial statements and reports that provided clients with a comprehensive view of their financial performance. This included analyzing revenue streams, identifying areas for improvement, and developing strategies to optimize financial outcomes.

Overall, my role as a financial services provider was challenging but rewarding. I was able to help clients make informed decisions, optimize their operations, and achieve their financial goals.
